RESEARCH INTERESTS

As a leader and innovator in the atmospheric sciences, I've employed novel analytical, modeling, "big data", and machine learning techniques to help pioneer the field of "atmospheric data science" and tackle cutting-edge research questions in the world of weather and climate. In my academic career I studied the multi-faceted role of aerosols in the climate system, especially their influences on clouds and their indirect effects on climate; I've also studied the role of climate variability in driving air quality as a means for better understanding the impacts of climate air pollution policy.

Throughout my research career I've been committed to helping develop open source software and tools in order to support novel applications of machine learning and data science to understanding and solving problems in meteorology. I've also strived to form a robust community of scientists, data scientists, and engineers who would also support these initiatives and themselves contribute to open science.

EDUCATION

Massachusetts Institute of Technology, Cambridge, MA
Ph.D., Atmospheric Science, Dept. of Earth, Atmospheric and Planetary Sciences OCT 2016
Committee: Chien Wang, Dan Czizco, Paul O'Gorman, Steve Ghan
Dissertation Title: Fundamental Aerosol Interactions and the Aerosol Indirect Effect on Climate

Cornell University, Ithaca, NY
B.S., Atmospheric Science, *magna cum laude*, Honors in Research DEC 2010
Thesis Advisor: Natalie Mahowald
Thesis Title: Volcano Impacts on Climate and Biogeochemistry

HONORS AND AWARDS

Outstanding Student Presentation Award (†), AMS	2015
National Science Foundation Graduate Research Fellowship, NSF	2012
National Defense Science And Engineering Fellowship, ASEE (<i>declined</i>)	2012
Father James B. Macelwane Award in Meteorology, AMS	2011
Klein Fellowship, MIT-EAPS	2011
Charney Prize, MIT-EAPS	2011
Academic Excellence Award - Atmospheric Science, Cornell/CALS	2011
Richard and Helen Hagermeyer Scholarship, AMS	2010

RESEARCH EXPERIENCE

Center for Global Change Science, MIT, Cambridge, MA
Postdoctoral Associate DEC 2016-SEP 2017
Studied interactions between air quality, climate variability and climate change funded through an EPA Air Quality, Climate, and Energy Center grant, supervised by Noelle Selin and Susan Solomon
Developed and analyzed large ensemble of IGSM/GEOS-Chem coupled climate-chemistry simulations to understand state-dependence of climate penalty calculations
Studied potential short-term policy impacts on air quality, health and the economy using a novel integrated assessment framework
Instigated and co-developed open-source, Python-based toolkits for accelerating the analysis of GEOS-Chem model output and working with legacy binary file formats in modern workflows

Program in Atmospheres, Oceans, and Climate, MIT, Cambridge, MA
Research Assistant AUG 2011-DEC 2016

Used novel uncertainty quantification techniques to develop emulator of droplet activation for parameterization in global models
 Developed an open-source, modular parcel modeling framework for studying droplet activation from diverse aerosol populations and for evaluating activation schemes
 Used global climate models (CESM, CMIP5 archive, AEROCOM Indirect Effects Experiment) to study aerosol indirect effects and aerosol-cloud interactions
 Participated in Fifth Ice Nucleation Workshop Part 2 in Karlsruhe, Germany; assisted with the operation of the Spectrometer for Ice Nucleation (SPIN) and developed software for automating the instrument and designing experiment setups

Department of Earth and Atmospheric Sciences, Cornell University, Ithaca, NY

Undergraduate Research Assistant

FEB 2008-JUN 2011

Studied biogeochemical/climate processes and interactions with a coupled carbon-climate model
 Performed and analyzed fully-coupled model simulations studying transient climate change in the 20th century

Center for Multiscale Modeling of Atmospheric Processes, Colorado State University, Fort Collins, CO

Summer Intern

SUMMER 2010

Implemented and evaluated a baroclinic instability test case on a very high resolution global atmospheric dynamical core, identifying numerical problems
 Developed novel visualization tools for analyzing model data on geodesic computational meshes

**PROFESSIONAL
ACTIVITIES**

CMIP6 Hackathon, NCAR, Boulder, CO October, 2019
Rosshypalooza, Climate/Statistics Summer School, University of Chicago, Chicago, IL SUMMER 2016
NSPG, STEM on the Hill Congressional Visits Day, Washington, DC SPRING 2015
AMS, Weather Water and Climate Day, Washington, DC JUNE 2015
AMS, 7th Annual Geosciences Congressional Visits Day, Washington, DC SEPTEMBER 2014
AMS, Summer Policy Colloquium, Washington, DC SUMMER 2014
MIT/SPI, ASTE Science/Engineering Congressional Visits Day, Washington, DC SPRING 2012/2014
CMMAP/NCAR/NCEP, Summer School on Atmospheric Modeling, Boulder, CO SUMMER 2010

**TEACHING
EXPERIENCE**

Graduate

Global Warming Science (12.340x)

SPRING 2016

MIT-EdX and MIT, Department of Earth, Atmospheric and Planetary Sciences
 Teaching Assistant

Atmospheric Physics and Chemistry (12.806/12.306)

SPRING 2014-2015

MIT, Department of Earth, Atmospheric, and Planetary Sciences
 Teaching Assistant

"Climate Change Science" IAP Seminar

WINTER 2011-2013

MIT, Joint Program on the Science and Policy of Global Change
 Lecturer

Undergraduate

Object-Oriented Programming and Data Structures (CS 2110)

2009-2010

Cornell University, Department of Computer Science
 Course Consultant, Teaching Assistant

LEADERSHIP
AND
SERVICE

American Meteorological Society

Committee on Environmental Stewardship	
Member	2019-PRESENT
Annual Meeting Oversight Committee	
Member	2017-2020
Student Conference Planning Committee	
Co-Chair	2015-2016
Session Chair	2011-2014
AMS Committee on Environmental Information Processing Technologies	
Member, Python Symposium Committee	2018-PRESENT
Session Chair, <i>Teaching, Training, Outreach, and Building Communities around Python</i>	2018
Session Co-organizer, <i>Scalable Operational Artificial Intelligence Applications with Python</i>	2019

Reviewer

WORK
EXPERIENCE

ClimaCell

Chief Scientist	SEP 2018-PRESENT
-----------------	------------------

Director of Meteorology	AUG 2017-SEP 2018
-------------------------	-------------------

Oversaw the research, development, and implementation of a real-time, global, high-resolution precipitation observation system using commercial cellular microwave links, radars, and satellite datasets
Created and managed long-term research and development roadmaps aligned with emerging company business and strategic opportunities

Managed a team of physical scientists, data scientists, and engineers across two offices conducting research and product development to support company initiatives

Established professional forecasting services unit within the company to broaden product portfolio in support of improving client satisfaction and retention

Developed and implemented a high-performance, Python-based quantitative precipitation nowcasting system optimized for performance on the cloud and deployed the model operationally (with >99.9% SLA) to provide nowcasts based on radar and satellite-derived datasets for domains across the world

Developed and prototyped a cloud-optimized, tera-scale geoscientific data archival system based on Pangeo stack (dask, Zarr, Intake, kubernetes) and curated over 100 TB of data from reanalysis (ERA-5), NWP (multi-year HRRR archive) and proprietary datasets

Google / Ravenbrook Software

SUMMER 2011

Contract Developer, Google Summer of Code

Ported a high-performance algorithm used in surface temperature analysis at the National Climatic Data Center from Fortran to Python

Developed extensive documentation and test suite for algorithm

Identified and corrected numerous numerical and programming bugs and validated algorithm against synthetic datasets

Orion Network Services

JUL 2006-AUG 2007

Software Developer

Developed an online river flooding visualization tool for NOAA using ArcGIS and other scripting tools

TECHNICAL SKILLS

Note: Please visit my [Github](#) page for examples of projects implementing these skills

Data Science - Python (*expert*), Spark/dask/MPI, Matlab, Java, d3.js, git/hg/svn, R (*familiar*)

Numerical Modeling - Python/NumPy/Cython/Numba, Julia, legacy/modern Fortran, C/C++/CUDA (*familiar*); emphasis on scientific software design and application of software engineering to numerical codes/tools, as well as the development of high-performance, distributed analysis systems for tera/peta-scale data.

Atmospheric/Climate Models - [pyrcel](#), GEOS-Chem/GCHP, CESM, MIT-CRM, WRF (*familiar*)

High-Performance Computing - Google Cloud Platform/Amazon Web Services; Multi-user shared clusters; NCAR supercomputers (bluefire/yellowstone/cheyenne); previously worked on NERSC and Oak Ridge systems

Web Design - Django, ghost, HTML/CSS

PERSONAL INTERESTS

Violin performance - classical (22 years), Winter sports, Backpacking/hiking, Software development/engineering, Meteorology education/forecasting, Debate and rhetoric, Science/Innovation policy
